ture during the winter at the Dom-
inion Experimental Station at Scott,
 Sask. eliminated leg weakness.

U. F. A. NOMINATING CONVENTION

The U. F. A. Nominating
Convention will be held at
Cereal on Saturday, May
25th, at 10 a. m. A mass
meeting in the evening will
be addressed by Hon. J. R.
Love, Provincial Treasurer.

Jubilee Medal Presented To Cereal Doctor

Recognition of his fine work
in this district as physician,
and surgeon, has come to Dr.
John Esler, of Cereal, who has
been presented with a silver
jubilee medal, as a mark of
appreciation for his services

Rural Telephones

A meeting of those interest-
ed in forming a local Rural
telephone company to take
over existing Government
owned lines was held at Col-
lholme School Sat. May 18th.

N. D. Stewart presided and
W. Wilson acted as Secretary.
It had been expected that Mr.
Blackburn of the telephone
Department would be there to
address the meeting but a
heavy rain at Hanna made
this impossible, however we
were fortunate in having Mr.
McLaren, telephone service
man who answered all queries
regarding the formation of a
local company and gave much
valuable information regard-
ing companies already formed
particularly those close at hand
as Cereal, Oyen and Sedalia.
At Oyen we understand the
local company has over one
hundred phones already in use
at the time the Government
turned control over to the local
company we believe there were
only some twenty subscribers
at Oyen.

After some discussion it was
decided not to organize until
more information could be ob-
tained regarding necessary
equipment for proposed lines,
number of subscribers obtain-
able and probable labor involv-
ed in reconstruction.

The following were appoint-
ed to committee to secure
names of those who would take
shares in the proposed com-
pany and to estimate equip-
ment required, E. B. Allen, N.
D. Stewart, W. Wilson, Geo.
Trojan, J. Haggerty, A. Spre-
man and S. W. Warren.

It was decided to meet at
Collholme school June 8th, to
hear committee report, and to
organize a local company.

Mr. Blackburn will be pres-
ent to help with the organiz-
ation and to answer any ques-
tions which may be asked. All
interested are cordially invited
to attend this meeting as there
is a crying need for Rural tele-
phones in this district. Dist-
icts on either side of us have or-
ganized and now have rural
service so surely we need not
lack this modern necessity es-

POCKET TREAT

SWEETENS THE BREATH!

The Opportunities Of Youth

Within recent weeks some thousands of young men and women have graduated from Canadian colleges and universities, received their diplomas, and are now ready and anxious to start out in the careers for which they have been fitting themselves. That is, there is a new small army of lawyers, doctors, clergymen, nurses, teachers, chemists, engineers, scientific agriculturists, and others in various lines of activity equipped to assume their share of the world's work. To that world they are prepared to bring not only the enthusiasm and energy of youth, but the very latest knowledge, ideas and methods.

In the course of the next few weeks additional thousands of young men and women will emerge from normal schools, colleges and high schools, not quite so highly trained, but who do not aim at a university degree, or who cannot afford the time and expense which years in college will entail. These, too, are ready and anxious to assume a place in the world's work.

Many of these young people have made great sacrifices and denied themselves pleasures, even comforts, to thus equip themselves, and many parents have made even greater sacrifices to assist and enable their children to obtain advantages which they themselves never enjoyed.

The unfortunate, the tragic, fact is that these young men and women face extremely difficult conditions in securing places in the professions or occupations for which they have equipped themselves. They enter upon the active scene at a time when the whole world is seething with unrest and social and economic upheaval which is the aftermath of a great war fought in the years of their childhood. There is nothing unusual in such an upheaval because a similar condition has followed after every great war in the world's history, the only difference being that in this more highly civilized and machine age standards of education and living are much higher than in bygone centuries, life is more complex, and we all expect and demand more than did our forefathers.

The world of mankind could not commit the enormous and terrible crime of the Great War and expect to escape the almost equally terrible consequences of the crime committed by them. The youth of to-day can truthfully say they are not responsible for that crime, and youth may ask why they should be punished because of it. But, no matter how great the changes that have taken place down through the centuries, neither the moral law nor the laws of Nature have been altered. They remain fast and unalterable, and it is still true as it has been from the beginning of time that the sins of the fathers are visited upon the children of succeeding generations.

Youth must face this solemn truth and, along with it, face conditions as they are and the responsibilities which are forced upon them. They must go out into the world as it is, and in doing so must decide for themselves what their attitude in and toward life is to be. They cannot, even if they would, evade their responsibilities and must discharge them either for good or ill as they themselves determine.

Is the young graduate in law looking on life and his profession merely as a means of livelihood, wealth and position, or is he inspired with a sincere desire to see justice done in all cases, wrongs righted, oppression removed, regardless of the fact whether it means wealth and position for himself or not?

Is the graduate nurse only desirous of obtaining steady employment, for herself, or has she a real vision of service in the profession ennobled by Florence Nightingale who gave her whole life to it without thought of personal reward?

Is the new medical doctor thinking only of a big and lucrative practice in some centre of population, or is he resolved to devote his life to the alleviation of suffering wherever it may exist, and the prevention of disease thus suffering may likewise be prevented, quite apart from material gain to himself?

In a word, are our new lawyers, doctors, nurses, teachers, engineers, clergymen, and others entering upon the activities of this sorely troubled world with purely material gain to themselves as their goal, animated by no finer ambition than some of that same selfishness which is to-day the curse of the world and has brought it to the state wherein youth now finds itself so severely handicapped, or are they prepared and ready, yes, determined, to do their part in the creation of a finer world, inspired by loftier motives of service, which they can pass on to their children?

Is the coming generation going to place stress on money, economic security for themselves, the attainment of social position and power, as so many of the past generation did and which ultimately ended in a world war or are they going to strive to excel in the rendering of service to their fellow men? Is it life itself, in its truest and highest meaning, they are going to live, or is it to be merely a striving for selfish possession of the material things of life?

The great names which history records with credit, and which remain household words to inspire, are not those of men and women who amassed wealth or achieved social position. No, they are the names of the disciples who, ignoring and abandoning all, followed the Master; names, too, like David Livingstone and Florence Nightingale; names of doctors, chemists, scientists and inventors who freely gave their discoveries to the world for the world's benefit and advancement; clergymen and missionaries who lived not for themselves but for others.

Youth to-day enjoys just as great opportunities for real service as at any previous time in the history of the world. The road of helpful unselfish service to uplift, elevate standards of thought and living, or the road of personal selfishness, thinking only of self, and thus tending to a further degradation of mankind and intensifying the troubles, sorrows and injustices of the world.

A sailing vessel built in Denmark in 1799 is still on its trade routes and is believed to be the oldest one in the world on active service.

WINDSOR SALT

Soybean Seed Varies

Amount Required For Acre Depends Largely On Variety

Soybeans may be drilled solid, like small grains, or seeded in cultivated rows, usually 28 inches apart. The grain drill can be used for both methods.

The amount of seed required to plant an acre depends to some extent upon the variety, as soybean seed varies somewhat in size, according to the variety. In general, however, row seeding will require from 30 to 45 pounds of seed per acre, while drilled seeding will require 90 to 120 pounds of seed per acre. The drill should be regulated to drop the seed about 1 to 2 inches apart in row planting, and 2 to 3 inches apart where drilled solid.

The time of seeding will vary somewhat according to locality and conditions. At the Central Experimental Farm, Ottawa, seeding about the middle of May has been found very satisfactory.

Building Special Machine

Britain Will Attempt To Regain Airplane Altitude Record

The attempt of the Royal Air Force to regain the airplane altitude record for Great Britain is to be made by specially selected officers in August. The present world record is that of 47,572 feet, reached by the Italian airman, Donati. For this stratosphere flight the Air Ministry recently placed an order for a special machine, and it is now under construction. The chosen crew will undergo training similar to that of Schneider Trophy pilots. One test which will be applied at the R.A.F. establishment at Farnborough, England, will be that of the "Decompression Chamber," in which a man is placed and his reactions noted to atmosphere conditions similar to those of the stratosphere.

HIS LUMBAGO HAS
NOT COME BACK

Keeps Free Of It With Kruschen

There can be no doubt about the effectiveness of the remedy this man uses against lumbago. Read his letter.

"About four years ago, I had a bad attack of lumbago. After being in hospital for two weeks taking heat treatment, I started taking Kruschen Salts. Since then, I am happy to say, I have not been troubled with lumbago. I shall still continue taking Kruschen to be sure the lumbago won't come back."—A. C. C.

Why is it that Kruschen is so effective in keeping lumbago at bay? Simply because it goes right down to the root of the trouble, and removes the cause, which is an impure bloodstream. The six salts in Kruschen keep the bloodstream pure and vigorous by promoting a clockwork regularity of all the organs of elimination.

Cyclone On The Sun

Represented By Group Of Enormous Spots Just Discovered

German astronomers and meteorologists report the discovery of a group of enormous spots on the sun ten times the size of the earth.

The Potsdam Observatory reported having found on the lower left edge of the sun a fantastically patterned group of spots, the length of which German scientists estimated at between 60,000 and 70,000 kilometers, between 37,500 and 43,750 miles.

The German astronomers say that these sun spots represent a cyclone of powerful dimensions which has suddenly appeared on the sun and now is moving in the upper gas stratum, sending great waves of electrical tension into space.

Foresees End Of Scourge

One Of Famous Mayo Brothers Says Cancer Being Conquered

Dr. W. J. Mayo, one of the two famous Mayo brothers of Rochester, Minn., predicted at San Diego, Cal., that "the day is not far distant when there will be no fear of cancer."

"Less than 10 per cent of American people are susceptible to cancer, and of these only a very small percentage ever contract it. It is with these that we are working," he said. "Medical science has made rapid strides toward control of cancer and sooner than many suspect will have it whipped just as medical science whipped typhoid fever."

"My papa's a mounted policeman," said little Pat to his mother's visitor. "Is that better than being a foot policeman?" she asked. "Course it is," replied Pat. "If there's any trouble, he can get away quicker."—2099

1000 PAIRS
OF MONARCH DEBUTANTE
SILK STOCKINGS
Free!

Go to your druggist or department store and buy RIT Dye (any color, 15c-2 for 25c). Use it. Then tell us in a statement of 30 words or less, why you prefer RIT—1,000 pairs of Monarch Debuts silk stockings—fashioned—shadow-free pure silk chif-fon stockings—latest Spring shades—prizes 10,000 entrants. There are dozens of reasons why you will prefer RIT. RIT comes in 33 basic brilliant colors, from which can be produced over 500 of the newest Paris shades.

FAST COLORS WITHOUT BOILING!
Only RIT offers this advantage! RIT is the modern tint or dye—easier and sure—far superior to ordinary "surface dyes" because it contains a patented ingredient that makes the color *soak in deeper*, set faster and last longer. Sold everywhere.

HOW TO WIN

1. Write a short statement (under 50 words) on why you prefer RIT Dyes and send it together with an empty RIT package (or reasonable facsimile) and your name and address, to John A. Huston Co. Ltd., 42 Calverton Rd., Toronto.

2. Send as many as you wish; contest closes midnight June 29, 1935.

3. 1,000 prizes will be awarded on the decision of the judges, which will be final. Whether you win a pair of silk stockings or not, we will mail to all entrants free of charge a booklet—"The A.B.C. of Home Rug Making."

Little Journeys In Science

WOOD ALCOHOL
(By Gordon H. Guest, M.A.)

Wood alcohol, or methyl alcohol, is made by the distillation of hardwood during the production of charcoal. It is one of the vapours that comes over in the distillation. Acids, such as acetic (vinegar) also come over; these are neutralized by ordinary water, and the crude methyl alcohol distilled off. Another method of producing wood alcohol has recently been discovered.

This new process consists of heating a mixture of two volumes of hydrogen with one volume of carbon monoxide over a substance known to chemists as a catalyst. Now a catalyst is something which speeds up a chemical reaction but it itself entirely unchanged. The catalyst used in this new method of making wood alcohol consists chiefly of zinc oxide.

Pure methyl alcohol has an odour and taste resembling ordinary alcohol. It is poisonous and many cases of blindness and death have occurred from drinking beverages containing wood alcohol. It should not even be used for alcohol rubs. This fault is changed into a virtue when methyl alcohol is used to denature ethyl alcohol (ordinary alcohol).

Wood alcohol has been used for many years in the dye industry and as a solvent in making polishes, lacquers, and varnishes. It is the raw material from which formalin, the well-known disinfectant, is made. Methyl alcohol burns with a flame of high heat value and hence is used in alcohol stoves.

In the production of methyl alcohol from wood three interesting by-products are produced. One is a mixture of methyl alcohol, acetone, and methyl acetate. This mixture is known in commerce as methyl acetone, and is used in large quantities as a paint remover. Another consists of a mixture of liquids known as ketones by the chemist and this material is used as a solvent in the lacquers for airplane wings. Still another is a compound called allyl alcohol, a peculiarly irritating liquid which is made into a compound forming the basis of an ointment which is used for colds and sore throats. This compound made from allyl alcohol is a synthetic mustard oil.

Silk thread, because it has greater tenacity than steel wire of the same diameter, is used by a German in making cannon. The cannon is made of steel tubes, wrapped with silk thread until the required size is attained.

Game Conservation

Demand For One Year's Moratorium On Waterfowl Shooting

Counselled by international conservation leaders, a massed petition demanding a one year's moratorium on waterfowl shooting is crystallizing in 11 midwest states and three Canadian provinces.

The movement, known as the Midwest Conservation Alliance, was organized for international midwest action on "the greatest wild life emergency America has faced since the passing of the buffalo."

Such international leaders as W. G. Ross, Moose Jaw, president of the Saskatchewan Fish and Game League, Kermit Roosevelt, New York, president of the National Association of Audubon Societies, and Jack Miner, Kingville, Ont., are numbered on the Alliance's active counsellors.

With preliminary activities indicating a unanimity of opinion for its objective, the Alliance is circulating petitions prepared on two forms—for sportsmen's clubs, and individual sportsmen. After signing these forms are returned to the St. Paul office for correlation. When complete, the massed petition containing names of thousands of midwest sportsmen on the international front will be personally presented to President Roosevelt to secure an executive order for a closed season.

"In extending an invitation to Canadian sportsmen to join the movement," the first M.C.A. bulletin read, "this organization does so with the realization that it is the duty of the United States to first put its 'house in order.'"

"Our responses from Canada have demonstrated beyond doubt the sporting blood of our neighbors, and have accentuated the need for United States' action on this problem. On the part of the past abuses on duck hunting as practiced in the States, Canada would have been justified in ignoring our appeal. We deem it our mandate to make reparation to waterfowl for our offences through staving off extirpation through a closed season for one year."

Inviting Canadian organizations to join the movement by signing petitions, the Alliance announced that all units desiring petitions may receive them by addressing to the St. Paul office.

"The organization represents the greatest concentration of conservation leadership and prestige ever assembled under a single campaign crusade," the bulletin concluded.

New Publications

McKim's 1935 Directory Of Canadian Publications Gives Evidence Of Improved Conditions

The 1935 McKim's Directory of Canadian Publications, just off the press, lists tangible evidence of improved business conditions, showing an increase of 22 new publications as against an increase of only 20 the previous year. Failures in the publication field decreased proportionately.

This 1935 edition of the directory is the twenty-eighth, the series having begun several years after the founding of the A. McKim Limited, advertising agency in 1880.

Recognized as an authentic gazetteer of advertising media throughout Canada, the directory gives exhaustive information about newspapers, magazines, trade papers and miscellaneous publications. Provinces, cities and towns where publications operate are all listed, together with population, industries and outstanding characteristics of market areas.

Somewhat larger than its predecessors, this edition will replace last year's directory on the desks of manufacturers, publishers and all firms dealing in advertising in Canada. Enquiries concerning the publication should be addressed to any one of the six McKim Advertising Agency offices at Montreal, Toronto, Winnipeg, Vancouver, Halifax or London, England.

A tire with especially heavy tread is one manufacturer's solution of the winter problem of driving on snowy and icy surfaces.

The Roll
of Honour

Call the roll of critical "roll your owners" and you'll find that Ogden's Fine Cut is their favourite cigarette tobacco.

Ogden's rolls cigarettes that are cooler—milder—more fragrant, because every leaf used is selected for quality, and mellowed by nature.

Ogden's Fine Cut and "Vogue" or "Chanticleer" papers are the combination receiving the highest honour from men who "roll their own."

A Clever Sculptor

Work Of Blind War Veteran Admired In Italy

Ernesto Masulli, who completely lost his sight in the World War, has become a sculptor in Rome. The ex-soldier had done no modeling until four years ago. His exceptional memory enables him to recall shapes and details, and he prefers to work in the dark when the household has gone to bed at night. In spite of his heavy handicap, Masulli has overcome the technical difficulties of his art without instruction. His work has been much admired in Italian art circles.

Several fragments of sixth century B.C. pottery discovered at ruins of Lachish, Palestine, bear the name of Jahve, spelled as Jehovah in the Bible.

THE HOMEMAKER

Homemaking is a dignified profession and the homemaker should give as much study to it as other professionals give to their professions. It is a responsible profession, since the well-being of every member of the family depends upon the efficiency of the homemaker.

To be a good homemaker, a woman must first have health. Otherwise she will be incapable, fretful and a source of unhappiness in the home. If the homemaker lacks health, she should apply her mind to becoming healthy. She should study the laws of hygiene, correct diet, proper exercise, sleep, fresh air and self control. If these do not suffice, she should have a medical examination and the overhauling which is recommended.

Sympathy and understanding are fundamental requirements of the homemaker, and her dealings with the members of the family are marked by tact and kindness. Good common sense, broad charity, optimism, a merry heart, appreciation of her blessings, experience of life and usefulness—the combination of these make the ideal homemaker.

In trying to do her duty by her home and family, the homemaker owes it to herself and to them to find some time each day for rest and recreation, to take a short nap, a walk in the sunshine, attend a club meeting, read something interesting or play a game. These keep her in tune.

Country Happenings

Mrs. A. Osterberg who underwent a major operation in the Cerebral hospital expects to return home this week.

The Prairie Rock Club met at the home of Mrs. Edwin B. Allen on Thursday. Mrs. J. Haggerty and Mrs. Allen being joint hostesses. The next meeting is to be held at the home of Mrs. Hutchinson.

The meeting called by Inspectors Scott and Thurber at Acadia Hall on Friday, for the ratemakers of district 2. 13, was poorly attended due to weather conditions. The meeting has been called again for Saturday, June 1st at 8 o'clock.

Mrs. W. Wilson, constituency Convener of the Acadia Alberta Provincial Women's Institute and Mrs. C. W. Rideout delegate from the Chinook W. I., also Mrs. Tilley from the Cerebral W. I. left on Sunday to attend the annual W. I. Convention held at Edmonton, June 21 and 22nd.

Alberta Leads Hog Marketing

For the first time in history, Alberta this spring has taken the lead among Canadian producers, in total of hog marketings, according to figures made available on Monday.

For the first 18 weeks of the current year, Alberta marketings totalled 342,995 head, compared with Ontario's 298,954 head.

There was also a further marked improvement in the quality of this province's hogs, the total percentage of select and bacon marks during the 18-week period under review being 55.05, thus passing the 50 per cent mark for the first time. In 1934, in the same period this percentage was 46.16 and in 1933 it was 40.50.

EDMONTON, May 21.—Holding hog production volume steady for the past three years and greatly improving the quality, Alberta has taken first place among the Canadian provinces for the first time.

Ontario formerly held first place but her production slumped this year with 25,000 head below Alberta for the first four months of 1935.

Official Federal grading reports show for the first 18 weeks of 1935 that there was graded in Alberta during 1935—338,427 hogs. The same period last year showed 342,995 and in 1933 333,271 hogs.

Cook a cup of diced celery until tender; add a pint of oysters and heat until their edges curl. Combine this with hot white sauce made with milk, flour, butter, salt and pepper.

Here and There

Lt.-Col. F. A. Gascoigne, recently retired secretary-treasurer, Canadian Pacific Steamships, has been elected president of the Dominion of Canada Rifle Association at the annual meeting of the Association held recently, succeeding Lt.-Col. R. C. Crowe, of the Ministry of National Defence.

D. S. Thomson, who has been appointed assistant superintendent, Canadian Pacific Railway, Smiths Falls, was, prior to his promotion, chief clerk in the office of the vice-president and general manager of the railway at Montreal. On leaving to take up his new appointment, he was presented with a gold standard railroad watch and a purse of money by his fellow-workers in the office.

Just 150 years ago the first Daly settled in Napanee and a few nights ago his descendants, Marjorie and John Daly, celebrated the momentous occasion at a supper dance at the Royal York Hotel, Toronto. This makes the sixth generation of the Daly family continuously resident in Canada.

Sixty-two calls at European ports will be made by the two express "Beaver" class cargo steamers of the Canadian Pacific fleet this summer, according to the season's schedule recently issued by Canadian Pacific Steamships. Crossings will take less than a half day in each direction and will touch at London, Antwerp, and Hamburg.

An appeal to the press to mould public opinion in support of larger grants for medical research, particularly into the cause and control of cancer, was voiced by Lt.-Governor Bruce of Ontario, at the Royal York Hotel recently at the banquet which wound up the seventh annual convention of the Canadian Weekly Newspaper Association, Ontario-Quebec Division.

Shi-tog and bear-hunting were combined at the Bates Camps, Metagama, recently, when two women skiers of Toronto, accompanied by a photographer, routed a bear out of his den and stood near while the animal was "shot" by a movie camera.

The Orient with its mystery and its lure, its brilliant colors and picturesque scenes, will form the inspiration for the Beaux Arts Ball, biggest event of the spring season, to be held the week after Easter at the Canadian Pacific Royal York Hotel, Toronto. The historic theme for the ball is the great festival at Samarcand held in 1404 to celebrate the triumph of Tamerlane's conquest of India.

Musical and literary England, and the England of the great cathedrals will be visited this summer by a party under the leadership of Dr. Alfred Whitehead, organist of Christ Church Cathedral, Montreal. Itinerary of the tour which will take about a month has been arranged by Gw. Tomba, Ltd., in conjunction with the Canadian Pacific Steamships.

Had the same research been put into other industries as has been employed in the automobile business, you would not hear so much today about the high cost of living, said Col. Frank Chappell, of General Motors, Ltd., speaking at a luncheon at the Lord Nelson Hotel, Halifax, recently.

THE CHINOOK ADVANCE

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in the advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

Advertisements under this heading are charged at the rate of 50c for 25 words or less per week, with 10c for each additional 5 words. Three weeks for the price of two. All letters addressed to the editor for insertion in The Advance, must be signed, to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

THE SIGN OF A FAIR DEAL

The Three-Star Imperial oval sign marks a place where you can buy with confidence; where you can be sure of good value and full measure.

It is the symbol of an organization that has steadily improved the quality and consistently reduced the price of petroleum and petroleum products—for gasoline prices today are lower than ever before.

The Three-Star Imperial oval sign stands for a fair deal to all; to you, the consumer, and to the labor engaged in making and marketing Imperial products. The thousands of Imperial Oil workers are well treated. Five thousand of them are part owners of the Company. They are paid good wages. They have sickness and death benefits and old age pensions which mean that in affliction or old age they and their families do not become dependent on funds which must be raised by taxation.

Because they are fairly treated, Imperial Oil employees work loyally, enthusiastically and enterprisingly. That is why, through the years, it has been possible steadily to improve the quality and consistently to lower the price of Imperial gasoline and oils.
